

ORIGINAL INSTRUCTIONS

TABLE OF CONTENTS

Welcome to Lumberjack!

Dear Customer, Congratulations on your purchase. Before using the product for the first time please be sure to read these instructions for use.

They provide you with all information necessary for using the product safely and to ensure its long service life.

Closely observe all safety information in these instructions!

GENERAL POWER TOOL SAFETY WARNINGS

WARNING Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term "power tool" in the warnings refers to your electric (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety

a) Keep work area clean and well lit. Cluttered or dark areas invite accidents.

b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

c) Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

2. Electrical safety

a) Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with grounded power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.

b) Avoid body contact with grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is grounded.

c) Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.

d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.

e) When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.

f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

3. Personal safety

a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

b) Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.

c) Prevent unintentional starting. Ensure the switch is in the off position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

GENERAL POWER TOOL SAFETY WARNINGS

e) Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.

g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.

4. Power tool use and care

a) Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.

b) Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.

e) Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.

f) Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

5. Service

a) Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

b) If the replacement of the supply cord is necessary, this has to be done by the manufacturer or its agent in order to avoid a safety hazard.

6 Additional Safety and Working Instructions

a) Dusts from materials such as lead-containing coatings, some wood types, minerals and metals can be harmful to one's health and cause allergic reactions, leading to respiratory infections and/or cancer. Materials containing asbestos may only be worked by specialists. Observe the relevant regulations in your country for the materials to be worked.

GENERAL POWER TOOL SAFETY WARNINGS

b) Prevent dust accumulation at the workplace.

Dusts can easily ignite.

7. Safety Warnings for Dust Extractors

a) Do not vacuum materials that are harmful to one's health, e. g. dust from beech or oak wood, masonry dust, asbestos. These materials are considered carcinogenic.

b) Use the dust extractor only when you fully understand and can perform all functions without limitation, or have received appropriate instructions. A thorough introduction reduces operating errors and injuries.

c) Do not vacuum inflammable or explosive fluids; for example, benzene, oil, alcohol, solvents. Do not vacuum hot or burning dust.

d) Do not operate the machine in rooms where the danger of an explosion exists. The dusts, vapours or fluids can ignite or explode.

e) The dust extractor may only be used and stored indoors. The penetration of rain or moisture into the dust extractor lid increases the risk of an electric shock.

f) When operating the dust extractor in damp environments, use a residual current device (RCD). Using a residual current device (RCD) reduces the risk of an electric shock.

g) Connect the dust extractor to a properly earthed mains supply. The socket outlet and the extension cable must have an operative protective conductor.

h) Before each use, check the dust extractor, cable and plug. Do not use the dust extractor when defects are detected. Do not open the dust extractor yourself and have it repaired only by qualified personnel using original spare parts.

Damaged dust extractor, cables and plugs increase the risk of an electric shock.

i) Do not drive over, crush or stretch the cable. Do not pull the cable to unplug the plug from the socket outlet or to move the dust extractor.

Damaged cables increase the risk of an electric shock.

j) During work breaks, when not in use or when working on the machine (e. g. changing tool inserts, repairs, cleaning, adjustments), pull the mains plug. This safety measure prevents accidental starting of the dust extractor.

k) Provide for good ventilation at the working place.

l) Have the dust extractor repaired only through qualified specialists and only using original spare parts. This ensures that the safety of your dust extractor is maintained.

l) Before restarting, check the proper condition of the vacuum hose. When doing this leave the vacuum hose mounted to the dust extractor to avoid dust from coming out. Otherwise, you could possibly inhale dust.

m) Do not use the dust extractor as a seat. The dust extractor could become damaged.

GENERAL POWER TOOL SAFETY WARNINGS

m) Use the mains cable and the vacuum hose carefully. Other persons could be harmed.

8. Using an Extension Cable.

a) If an extension cable is required, use an approved triple core extension cable suitable for the power input of the tool.

b) Grounded tools always require a three wire extension cable.

c) As the distance from the supply outlet increases you must use a heavier gauge extension cable. Using extension cables with inadequately sized wire causes a serious drop in voltage, resulting in loss of power and possible tool damage.

d) The smaller the gauge number of the wire the greater the capacity of the cord.

e) When using a cable reel, always unwind the cable completely.

SYMBOLS AND POWER RATING CHART

Danger! – Read the operating instructions to reduce the risk of injury.

Caution! Wear safety goggles.

Caution! Wear ear defenders. The impact of noise can cause damage to hearing.

Caution! Wear a dust mask.

MACHINE DETAILS AND PRODUCT FEATURES

Machine Details

Specifications:

Mains Voltage -	230V / 50Hz
Power Consumption -	1100W
Inlet Hose Diameter -	140mm
Air Flow -	555 Ltr/sec
Collection Capacity -	130Litres
Gross Weight -	44.0kg
Nett Weight -	42.0kg

Package Contents:

Motor
Frame assembly
Side panels
Centre panel
Collection hose
Filter bag support
Collection bag
Filter bag
Hose clamp
Upper retaining strap
Lower retaining strap
Hose connector

Intended Use

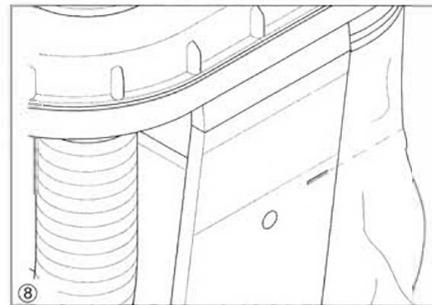

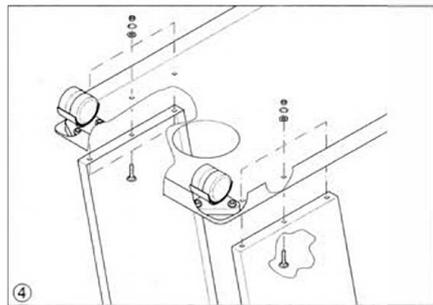

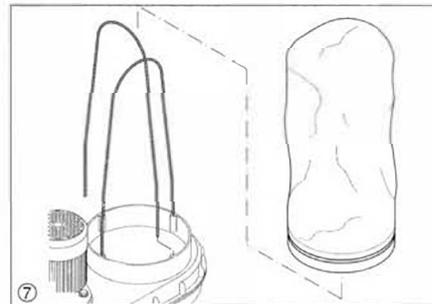

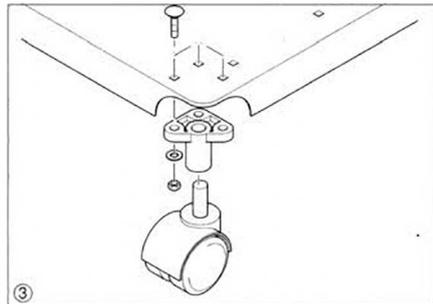

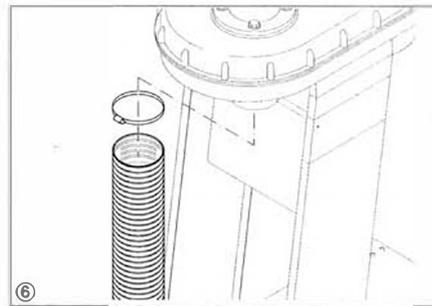

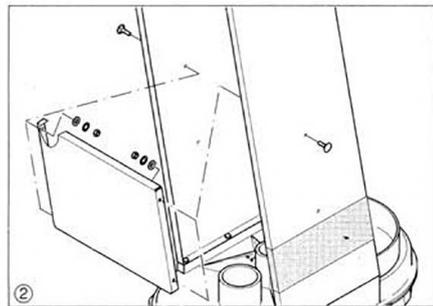

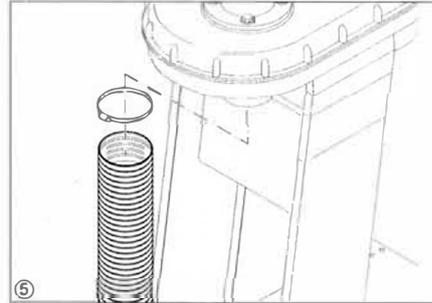

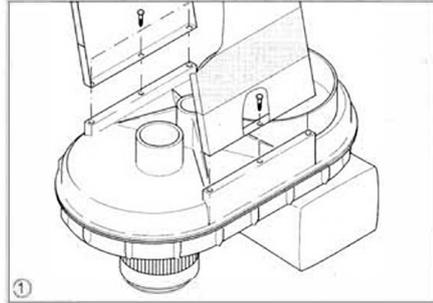

This power tool is intended to remove and collect wood shavings only. Any other use is considered as not intended use and any damages or injuries result from this unintended use is at operators own risk. This item is also not intended to be used for continuous production or production line use.

Product Features

1. Collection hose
2. On/Off Switch
3. Filter bag support
4. Filter bag
5. Handle
6. Collection bag

ASSEMBLY INSTRUCTIONS

Assembly

ASSEMBLY INSTRUCTIONS /OPERATION

Assembly

Fig. (1): Place fan housing 2 with motor facing down on workbench or other sturdy support and use a wooden block or similar to support it in a level position.

Attach side panels 3 and 4, with labels facing outward, with thread cutting screw 1 supplied to the fan housing.

Fig. 2: Install cross plate 5 with cup square neck screws, washers and hexagon flange nuts between side panels.

Fig. 3: Install a castor socket on each corner of the base plate. Fit three each cup square neck screws 6 M 5 x 20 through bottom panel and castor socket 7, and secure with washers 8 and hexagon flange nuts 9. Afterwards push twin caster 10 into castor socket.

Fig. 4: Put the so pre-assembled base plate onto the side panels as shown, and secure with cup square neck screws and hexagon flange nuts. Afterwards check that all screw connections are tight and stand machine on the casters.

Fig.5: Fit hose clamp 11 to end of suction hose 12, then push hose on the suction port below the motor, tighten hose clamp.

Fig.6: Fit dust bag 14 to dust collection opening. Use dust bag of appropriate size (e.g. 600 x 900 mm), and clamp to opening with tightening strap 13.
Tip: Fit opening of dust bag tight around dust collection opening and fold overlapping section. Pull tightening strap over it and tighten.

Fig. 7 Bent the two flexible rods 15 into a 'u' and fit their ends into the four holes on the neck of the housing's filter bag opening.
At the vertex secure the rods crosswise with a cable tie.
Fit dust bag 16 and tightening strap 17 over the filter bag opening and tighten strap.

Operation

Woodworking operations will cause dust to become airborne with the potential to be highly toxic; we always recommend wearing a face mask during these operations, as well as ensuring the area is well ventilated.

Before using your dust collector:

- Learn the function and correct use the on/off switch.
- Read and understand all the safety instructions and operating procedures throughout this manual.

Before each use:

- Inspect your dust collector, if any parts are missing, damaged, bent, or fail in any way, or any electrical components do not work correctly, turn off the dust collector and remove the plug from the mains supply.
- Replace damaged, missing, or failed parts immediately.
- When cleaning the collection bags, always wear a dust mask and eye protection.
- Ensure all clamps, collection hose and bags, are secure.
- Connect the other end of the collection hose to your machine.
- To start the dust collector; press the green (I) button.
- To stop the dust collector; press the red (O) button.

Your dust collector is fitted with a safety NVR (no volt release) switch. This means that if power is cut to the dust collector (such as in a power failure); the motor will not start to run once the power is returned without the operator following the above instructions to restart the dust collector.

MAINTENANCE AND SERVICE

Maintenance and Service

Maintenance and Cleaning

Before any work on the dust collector itself, pull the mains plug.

For safe and proper working, always keep the dust collector and ventilation slots clean.

If the replacement of the supply cord is necessary, this has to be done by an authorised service agent in order to avoid a safety hazard.

If the dust collector should fail despite the care taken in manufacturing and testing procedures, repair should be carried out by an authorised service centre.

This dust collector needs very little maintenance; a common sense approach should give you years of good service.

- Ensure all nuts/bolts etc. are tight before each use.
- Empty and clean bags regularly.
- Ensure that all hoses are clear from debris regularly.
- Always keep the motor free from contamination.

If your collection/filter bags become damaged they must be replaced.

LUMBERJACK GUARANTEE

1. Guarantee

1.1 Lumberjack guarantees that for a period of 12 months from the date of purchase the components of qualifying products (see clauses 1.2.1 to 1.2.8) will be free from defects caused by faulty construction or manufacture.

1.2. During this period Lumberjack, will repair or replace free of charge any parts which are proved to be faulty in accordance with paragraph 1.1 providing that:

1.2.1 You follow the claims procedure set out in clause 2

1.2.2 Lumberjack and its authorised dealers are given reasonable opportunity after receiving notice of the claim to examine the product

1.2.3 If asked to do so by Lumberjack or its Authorised dealer, you return the product at your own cost to Lumberjack's or supplying Authorised Dealer's premises, for the examination to take place clearly stating the Returns Material Authorisation number given by Lumberjack or an Authorised Dealer.

1.2.4 The fault in question is not caused by industrial use, accidental damage, fair wear and tear, wilful damage, neglect, incorrect electrical connection, misuse, or alteration or repair of the product without approval.

1.2.5 The product has been used in a domestic environment only

1.2.6 The fault does not relate to consumable items such as blades, bearings, drive belts, or other wearing parts which can reasonably be expected to wear at different rates depending on usage.

1.2.7 The product has not been used for hire purposes.

1.2.8 The product has been purchased by you as the guarantee is not transferable from a private sale.

2. Claims Procedure

2.1 In the first instance please contact the Authorised Dealer who supplied the product to you. In our experience many initial problems with machines that are thought to be faulty due to faulty parts are actually solved by correct setting up or adjustment of the machine. A good Authorised Dealer should be able to resolve the majority of these issues much more quickly than processing a claim under the guarantee. If a return is requested by the Authorised Dealer or Lumberjack, you will be provided with a Returns Material Authorisation number which must be clearly stated on the returned package, and any accompanying correspondence. Failure to provide a Returns Material Authorisation number may result in item being refused delivery at Authorised Dealer.

2.2 Any issues with the product resulting in a potential claim under the guarantee must be reported to the Authorised Dealer from which it was purchased within 48 hours of Receipt.

2.3 If the Authorised Dealer who supplied the product to you has been unable to satisfy your query, any claims made under this Guarantee should be made directly to Lumberjack. The Claim itself should be made in a letter setting out the date and place of purchase, giving a brief explanation of the problem which has led to the claim. This letter should be then sent with proof

LUMBERJACK GUARANTEE

of purchase to Lumberjack. If you include a contact number with this it will speed your claim up.

2.4 Please note that it is essential that the letter of claim reaches Lumberjack on the last day of this Guarantee at the latest. Late claims will not be considered.

3. Limitation of Liability

3.1 We only supply products for domestic and private use. You agree not to use the product for any commercial, business or resale purposes and we have no liability to you for any loss of profit, loss of business, business interruption or loss of business opportunity.

3.2 This Guarantee does not confer any rights other than these expressly set out above and does not cover any claims for consequential loss or damage. This Guarantee is offered as an extra benefit and does not affect your statutory rights as a consumer.

4. Notice

This Guarantee applies to all product purchased from an Authorised Dealer of Lumberjack within the United Kingdom. Terms of Guarantee may vary in other countries.
